Ouverture morphologique – Optimisation

A 5x5 grid of morphological values. The top two rows contain values 2 and 3, while the bottom three rows contain 0. A red box highlights a 2x2 sub-region in the top right corner, specifically the cells at (row, col) coordinates (1,4), (1,5), (2,4), and (2,5). The cell at (1,5) is highlighted in blue, while the others in the box are green.

Beaucoup d'accès en lecture/écriture dans la mémoire globale
Optimisation : Utiliser la mémoire partagée

Seuillage hystérésis

- Seuil Haut
- Seuil Bas
- Propagation

Seuillage hystérésis

- Seuil Haut
- Seuil Bas
- Propagation
- Réduction du bruit (Fausse détection)
- Lissage des contours
- Flexibilité grâce aux seuils

Seuillage hystérésis

- Traitement des pixels
- Utilisation de 3 images
- Propagation
 - Voisinage
 - Limitation ?

CPU

Seuillage hystérésis

- Parallélisation
- Traitement individuel des pixels
- Utilisation de 2 images
